## **Massage**

Massage is the manipulation of the body's soft tissue. Massage techniques are commonly applied with hands, fingers, elbows, knees, forearms, feet or a device. The purpose of massage is generally for the treatment of body stress or pain.

### **Deep Tissue massage**

Deep seated tensions and chronic pains are dissolved by powerful palm and finger pressure massage technique

### **Aromatherapy**

A soft pressure massage with special oils to improve health and well being.

### **Hot stone massage**

The therapeutic power of touch is combined with the energy of hot stones to align and harmonise your chakras. This can be extremely effective in relaxing both body and mind, flushing away irritating toxins and releasing pain.

### **Back-neck-shoulder & scalp massage**

Muscle relaxation can improve flexibility, reduce pains caused by tight muscles and even improve sleep
